

Form Bridge - NEWSLETTER

SITE PEDAGOGY, AN APPROACH RETHOUGHT TO ENCOURAGE FORMATIVE BRIDGES.

09/2019 – 12/2021

This newsletter focuses on Intellectual Production O1: Basic foundation of common transversal skills developed through site pedagogy.

The FormBridge consortium, conscious of the importance of a collective dynamic of the actors of the territories to reinforce synergies around the objectives set by the project and to diversify the skills of the actors, made the choice to open the local partnerships to all the actors of the territory, public and private.

This broad mobilisation will be achieved by setting up Think Tank working groups open to all stakeholders. These actors who are members of a "**reinvented educational alliance**" will contribute to the creation of the local project and will be associated to the construction of the common base of competences, which, once defined, will then allow us to co-construct training paths adapted to the evolution of the labour market and to the needs of companies and territories, through the methodological approach of site pedagogy which represents an opportunity to link learning, citizenship and the development of territories.

Through these Think Tank working groups, the FormBridge project aims to create synergies between educational institutions, businesses and intermediary organisations by putting the young person at the centre of the learning process.

Etudes et Chantiers Corsica, Corsica - France :

Think thank and Members of the educational alliance

6 members from the local heritage site project "Les Sentiers du patrimoine" in the village of Patrimonio :

- ECC
- Upper Corsica Education League,

Website

Under consideration

Target audience

Young people from 16 to 19 years old

Training courses

Avenues for reflection :

- Make the PoC methodology a permanent module of the study pathway of the education and training system
- Using the PoC as a tool to fight against dropping out (experiential learning)
- Experimenting with PdC with asylum seekers
- Introduce a PoC workshop in a 3-year project with the Bologna City Council which aims to create project workshops focusing on entrepreneurship as an entrepreneurial capacity. This is a project for territorial development and cohesion based on models of social innovation based on the valorisation of common assets and collaboration between citizens, associations and public administration.

Alpes de Lumière - Provence, France

Think thank and Members of the educational alliance
